

Light Fixtures for Uhlmann Giant Umbrellas

The OSRAM lights are proudly installed on the Uhlmann Giant Umbrellas. These lights are extremely economical and offer appealing, classic designs for architectural and landscape illumination. Wherever they are installed, – these luminaries add a special accent to any location, and provide light safely and reliability in any weather.

The OSRAM lights provide

- Soft, glare-free light
- Instant flicker-free starting
- Silent operation
- Long lamp life
- Energy saving

On the **Type T and Type Tx Umbrellas** the OSRAM lights are mounted on the mast. A set of 4 lights can be installed. Above the light fixtures the distribution rings connect electricity to the lights and/or to an additional distribution ring that is pre-wired for heaters.

OSRAM Lumilux Combi EL 18W Lights

On the **Type TL and TLx Umbrellas** the lights are mounted on the roof arms. A set of 4 lights can be installed.

The distribution ring is located on the mast and it connects to another distribution ring on the top of the telescope from where the electricity is connected to the lights and/or heaters.

OSRAM Lumilux Combi lights installed

For our **decorative wood or marble coated Type T and Tx umbrellas only** we can install the attractive GE Stylo 108 8W lights on the mast.

GE Stylo 108 8W

- Immediate on.
- Lower wattage than standard magnetic control gear allows up to 20% energy saving.
- Lower heat emission.
- No flicker and stroboscopic effect for better visual comfort.
- Absence of electromagnetic interference.
- Quiet operation.

All Uhlmann Giant Umbrellas can be pre-wired for lights and heaters.
